

**NATCHEZ
SERIES 3000
ALUMINUM PATIO DOORS**

Our aluminum patio door provides a solid combination of thermal efficiency and affordability. With double weather stripping, this door provides additional weather protection. And as with every Croft product, our aluminum patio door is built for life.

STRENGTH

- 4" to 5" Frame depth depending on frame configuration
- Fabricated from Croft produced Heat Treated Aluminum extrusions

ENERGY SAVINGS

- Energy efficient 5/8" Intercept glass
- Full range of glass packages offer increased thermal performance
- Extra deep panel interlocking rails are double weather stripped providing additional weather protection

BEAUTY

- Painted with a baked-on polyester finish which resists scratching and chipping
- Available in a variety of colors
- Decorative hardware

RELIABILITY, CONVENIENCE AND SAFETY

- Comes fully assembled or knocked down
- Available in different frame configurations for various construction requirements
- Shatter-resistant tempered safety glass provides added protection
- Positive screen track system securely locks screen into upper frame preventing screen from jumping track
- Smooth finger tip opening and closing of door with heavy duty 1" diameter rollers that are adjustable for easy panel alignment

Optional Glass Packages Include:
Tinted, Obscure, Low-E
and Argon Gas Filled
